Safer, healthier, wealthier: The economic value of reducing work-related injuries and illnesses

University of Bordeaux, 4 April 2023, 9:00-10:30 (UTC+2)

Registration: https://u-bordeaux-fr.zoom.us/webinar/register/WN_vsji7Y18Q26U4p2WpnyuA

Programme

SPEAKER

Phillip WISE, Director, Data Analysis, Evidence, Communications and Strategic Policy Branch, Safe Work Australia

DISCUSSANT

Marian SCHAAPMAN, Head of the Unit Health & Safety and Working Conditions of the Research Department, European Trade Union Institute (ETUI), Brussels

Moderator: Loïc LEROUGE
Holder of the CIECST, France

Safe Work Australia commissioned Deloitte Access Economics to undertake research exploring the cost of workplace injury and illness in Australia. Using innovative computable general equilibrium (CGE) modelling, the study estimates how much value could be created within the Australian economy by removing work-related injury and illness.

Findings from the study demonstrate the broad economic benefits that can be realised with better work health and safety, including more jobs and better pay.

The workshop aims to present the results of the report by **Phillip WISE** and to discuss them by **Marian SCHAAPMAN** before opening the debate.
